

ABSTRACT OF THE DISCLOSURE

A multipurpose tool assembly to perform a divot repair
5 operation, a coring operation and/or a green surface smoothing
operation on a golf green. There is an elongate operating section
having on one end a divot repair tool portion and on the other end
a coring tool portion. The operating section can be connected to
the handle in either of two configurations to perform either the divot
10 repair operation or the coring operation.
